What is GP Clen? Clenbuterol in Bodybuilding.

First of all, it should be noted that clenbuterol refers to beta 2 agonists, respectively he excites beta2-adrenergic receptors. In many countries, clenbuterol have long been using for treatment of asthma and lung disease. It is necessary to specify that the FDA has not approved clenbuterol as a medical remedy because of its very long half-life. Some scientists believe that half-life period of clenbuterol lasts for 48 hours, but recent studies have shown that this period is 35 hours.

The use and dosage of GP Clen. This drug is available on the market by 40 mg tablets. Dosage depends on the patient, and more specifically on its response to drug side effects. When body temperature drops to the usual standards, this occurs at 6 -8 weeks of use, clenbuterol is losing its effect. Its anabolic properties, too, disappear for about 16-18 days.

Use of GP Clen. Clenbuterol can be used as extra help during recovery. This will also feed in sufficient quantity, without worrying about the fat folds. It also helps to maintain both the strength and intensity in training. But the most common way to use clenbuterol fat loss is. When this patient increased rigidity of muscles, vascularity, strength. The same effect can be achieved on a low calorie diet. Clenbuterol also be combined with such as T3.

Clenbuterol has anabolic properties that are similar to steroids, but to a lesser degree. Especially suitable for increasing the force stiffness of muscles. Diet consists of: a lot of protein, moderate amounts of carbohydrates and fats.

Possible side effects of GP Clen. Nausea, vomiting, dry mouth, rapid heartbeat, dizziness, insomnia, sweating, and many others. But the most frequent and most common effects are: muscle cramps, restlessness, headache and high blood pressure.

Some side effects can be avoided, for example, in order to avoid muscle cramps should drink per day 5.8 liters of water and eat bananas and oranges. Also helps to have potassium, 200 - 400 grams a day at bedtime on an empty stomach. Headaches can be prevented taking analgesics such as acetaminophen at the first sign. Some want to receive the dose increased by 2 times.

Bodybuilders should be certain to consume plenty of water while taking Clen and never to consume more than three tablets a day. Most prefer to take their tablets in the morning in order to give the effects time to subside before bedtime. Those with history of heart problems should not use Clenbuterol hydrochloride. Women also find favour with Clenbuterol hydrochloride, but at lower dosages.
